

Date/Time Stamp

is the record of events organized by time and date. Each event is stored in the event database.

Building ID

sorts events by building, elevator, and/or time.

Elevator Number & Floor

identifies the elevator and the floor it was on when event occurred.

Event Descriptions

describes the actual event, such as elevator shutdown, safety string open, clipped door lock.

Advantages

- ▶ State-of-the-art monitoring is now universally available for all the controllers you service, allowing you to offer remote monitoring to all of your customers regardless of controller type.
- ▶ ORM units can be looped together for use in multiple car groups.
- ▶ 24/7 monitoring and web accessible data provide a competitive edge to trump your competition.
- ▶ Provides an effective tool to manage attrition (churn/account loss) because you'll have the information to provide efficient service and the data to prove up-times.
- ▶ Provide your customers with a limited view of ORM data, if you choose, with a simple web login.
- ▶ All this at a price that makes sense.
