# SafeCall SOLUTIONS for every application

**FOR POOLSIDE:**  
Rugged, Outdoor Area Emergency Phone

**FOR FITNESS CENTERS OR WHEREVER REQUIRED:**  
AED Defibrillator Storage Cabinet with Integrated Emergency Phone

**FOR PARKING AREAS:**  
Rugged, Outdoor Area Emergency Phone with Strobe Light

**Your Emergency Phone Headquarters** Since 1989, Kings III has provided its SafeCall Solution to property managers, owners, and government agencies. One low fee covers all necessary equipment and installation of your pool phone. You could even save up to 50% every month over other code-compliant systems.

**Emergency Pool Phones are the Law** Many states require emergency phones at all publicly accessible pools. These systems must also be answered 24 hours a day at a location capable of dispatching help.

The reality is that proper installation is required to produce a truly code-compliant system. Practices such as multiple emergency phones sharing a single line without line seizure capability, or programming to call a number that is not answered 24 hours a day are common examples of compliance mistakes. Use of multiple vendors to assemble your system often results in costly and poorly integrated solutions.

**What's the Answer?** The SafeCall Solution provides all equipment, installation, monitoring and maintenance in one complete package. We'll even guarantee the code compliance of the initial installation and name your property an Additional Insured under our \$15 million General Liability and E & O policies at your request.

**Eliminate Costly Phone Lines** Special features, such as our patented phone dialer (patent # 5,386,463) with line seizure, can save you the cost of dedicated phone lines. This breakthrough technology seizes an existing phone line to call our 24-hour emergency call center. If no landline is available to seize, our unique cellular technology is often the perfect solution.

**Optional Automatic Testing** SafeCall phones can also be programmed to make check-in calls on a preset schedule. This provides additional peace of mind that your phones are ready for any emergency.

**Emergency Call Center** The user's location is instantly displayed on the computer screens of our CPR certified operators and AEMD supervisors who are specially trained in handling emergencies. Every call is digitally recorded and all actions are permanently stored automatically. Kings III monitoring may reduce unnecessary 9-1-1 dispatches and false dispatch fines.

**Maintenance Included** Should the equipment need repair, we'll fix it at no additional cost. You will never pay for faulty Kings III equipment, eliminating the need to budget for surprise emergency phone repairs.

**Losing Your Payphone?** Many phone companies are removing money-losing payphones right now. Don't let an unexpected payphone removal close your pool.

Replace your inferior quality pool phone or payphone with the gold standard in pool phone reliability, the purpose-built SafeCall Solution.

**Call today and get the peace of mind you deserve.**
